Education

Gl Bajaj Institute of Technology & Management **Sep. 2024 – May 2027**
Bachelor of Computer Applications *Greater Noida, Uttar Pradesh*

Experience

Agumentik Group of Companies **May 2026 – July 2026**
Full Stack Developer – MERN *Remote*

- Engineered and optimized core modules of SpeedCopy using the MERN stack (MongoDB, Express.js, React.js, Node.js); refactored Mongoose queries and implemented Redis caching, reducing average API response time by 35% and page load time by 40%.
- Architected a full-stack EdTech CRM using the MERN stack with a RESTful API layer and Mongoose schemas to manage leads, student enrollments, and counselor workflows.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure admin, counselor, and management dashboards with permission-specific views.
- Built a responsive React.js and Redux frontend enabling real-time lead status tracking, follow-up scheduling, and enrollment pipeline management for the counseling team.

Projects

NodeCraft | *Next.js, TypeScript, PostgreSQL, Prisma, Liveblocks, Gemini API* | GitHub | Live **August 2026**

- Built AI-powered diagram generation with Google Gemini and Trigger.dev background jobs, rendering results live on a React Flow canvas.
- Implemented real-time multiplayer collaboration with Liveblocks and React Flow, featuring live cursors and presence (Tailwind CSS, shadcn/ui).
- Designed backend with Prisma and PostgreSQL, built a Clerk-authenticated Markdown export pipeline using Vercel Blob.

Interactive 3D Portfolio Website | *Three.js, React.js, WebGL, CSS3* | GitHub | Live **June 2026**

- Built an interactive 3D portfolio using Three.js, rendering a virtual desktop scene with real-time camera interactions.
- Embedded a React-based web OS within the 3D monitor using iframe and CSS3D transforms, enabling seamless integration of 2D web apps inside a 3D environment.
- Implemented WebGL-based rendering and asset optimization to ensure smooth performance and responsive UI navigation.

Anga | *React, Node.js, Express, MongoDB, JWT* | GitHub | Live **August 2026**

- Contributed backend APIs for Anga using Node.js, Express, MongoDB, and Mongoose, with JWT authentication and role-protected routes for jobs and applications.
- Built frontend features using React, TanStack Router/Query, and Tailwind CSS, covering worker and customer job-discovery and profile flows.
- Developed an AI assistant that matches workers to nearby jobs by intent, with bilingual English/Hindi command support.

Technical Skills

Expertise Area: Data Structures & Algorithms, Web Development, Problem Solving
Languages: C++, HTML/CSS, JavaScript, SQL
Tools & Technologies: Git, GitHub, VS Code, Postman, Chrome DevTools, Vercel, Google Cloud Platform, React.js, Node.js, Express.js, MongoDB, Mongoose, REST APIs, Redis, Next.js, JWT, PostgreSQL

Achievements

Competitive Programming and Hackathons **July 2025 – Present**

- LeetCode: Solved 264+ DSA problems, demonstrating strong problem-solving skills and proficiency in data structures and algorithms.
- Build for Good National Hackathon — Finalist: Collaborated on Anga, a full-stack job-marketplace platform, placing among the Top 10 teams out of 3,000+ registered students nationwide and earning a MacBook Pro.
- Achieved max rating 1038 on Codeforces through participation in competitive programming contests.
